

SALVADOR FLORES
artist
biography

Salvador Flores is a Mexican architect who studied art with Leiton, one of the most influential artists in the North Mexico. His style is inspired by geometric abstraction, Surrealism, and Minimalism. Kandinsky, Hans Arp, Paul Klee, and Latin American Surrealists have all impacted Salvador's art. As a lover of the Surrealists, Flores images are like a journey through the intangible world. The artists' motivations come from the unknown, or rather from the imperceptible: the relation of heaven and earth; good and evil; spirit and soul. As far as Salvador's style is concerned, the artist described his own technique as 'controlled experimentation' which involves the search for balance between colour and texture.

Comments about the artist's work from European and American artists:

*"Hello Salvador, I've visited your page, some of abstract works are very nice. With best regards, Oleg".
Oleg Sheludyakov. May 1st, 2007. Russia (lives in France).*

"Hey - your work is very excellent! Very natural and unforced - good texture rhythm and flow, also feels a bit subconscious - very cool stuff!?" Jeffrey Kretchmer March 30, 2007. Chicago.

"Hello Salvador Flores, I looked at you work too. The bleu work got my preference. It comes close to the work of Kandinsky. Scars is a nice term to define you work. Are you only painting or do you also make sculptures? I can imagine that treating wood or stone in the same manner as your painting can lead to interesting results. Greetings from Belgium". Tim Ceustermans-Deschepper. March 15, 2007. Belgium.

"Mr. Flores, Your work is an inspiration! Simply wonderful!" Brian Sherwin. January 19, 2007. Chicago / New York.

SALVADOR FLORES
artist
curriculum vitae
